Address

47 Avenue de Strasbourg, METZ

About me

I am currently in the second year of a Master's program in Mathematics & Applications, specializing in Probability and Applied Statistics, and I am seeking a quantitative finance internship of four months or longer, starting in April 2027.

Soft skills

Interpersonal skills

Python, Matlab, R, MS Office

Organization capacities

Team work

Analysis and synthesis abilities

Autonomy

Languages

French (Native)

English (B2)

Leisure

Music

Classical guitar, piano, harmony and composition lessons.

Training & Diplomas

Master Degree - Applied Mathematics 2025 - In progress
Université de Lorraine, Metz

- Further training in fundamental mathematics : Hilbert analysis, functional analysis, scientific calculus.
- In-depth training in applied mathematics : probability theory, statistics, optimization, algorithmic, neural networks, data analysis, modelization.
- Strengthened skills in scientific programming (Python, Matlab, R).
- Writing a master thesis on an introduction to continuous-time stochastic calculus applied to linear and non-linear filtering problems.

Bachelor Degree - Mathematics 2022 - 2025
Université de Lorraine, Metz

- Bachelor's Degree with Highest Honours.
- In-depth formation in both fundamental and applied mathematics : analysis, algebra, linear and bilinear algebra, probability theory, statistics, numerical analysis, simulation, differential calculus.
- Strengthened skills in scientific programming (Python, Matlab, R).
- Writing a bachelor thesis on resolution of fractional differential equations.

Baccalauréat 2022
Lycée Antoine de Saint-Exupéry, Fameck

- Grade : Highest Honours (Average grade : 17.65)
- Specialised courses : Mathematics, Computer Science, Physics & Chemistry

Experiences

University tutor in Mathematics 2024 - 2026
Université de Lorraine, Metz

- Organization and leading of tutoring sessions for first-year students in Mathematics and in Mathematics for the Primary School Education:
 - Clear explanations and simplification of fundamental concepts in logic, analysis, algebra and linear algebra.
 - Adaptation to the diverse levels in mathematics of the students.
 - Targeted preparation for assignments, midterm exams, and final exams.
- Strengthening of pedagogical and communication skills.

Research internship in Mathematics 2024 - 2025
Élie Cartan Institute of Lorraine, Metz

- Analysis of scientific articles about Markov Chains and Monte Carlo methods by Markov Chains (MCMC)
- Ising model simulation with MCMC.
- Writing a structured article, synthesising the obtained results and the methodology.
